Ultra CCTV Tower Range

Our Flagship Ultra range of towers are ideal for larger remote sites that have interrupted power supply and require advanced features such as H&S announcements, thermal, time-lapse and ANPR.

An Overview of the Product's Features and Benefits	
7 Meters Tall	The largest tower on the market, acts as an Overt visual deterrent.
Solar/Generator/Mains Options with 106hr battery backup	Ability to run off grid when there is no site power or site power is switched off over a weekend.
Dual 4G Mobile Network Communication	No fixed comms required from customer, redundancy and resilience to network coverage issues.
PTZ with 20x Zoom and powerful low light performance	300m coverage area.
110Db Loud speaker	Live Audio Challenge to acts as a deterrent to any intruders
Wireless PIR or Verifeyed Detectors	Coverage of large sites with cameras automatically moving towards to triggered presets . The use of Verifeyed detectors also provides further image evidence capture and reduces false alarms by using AI to analyse the image.
30 Days HD Recording	HD Recording can be used as evidence for security and H&S investigations.
IR and White Light Options	Visibility at night and optional white light option to deter intruders.
Modular Design	Can be installed anywhere - no lifting equipment required.
Low Carbon Footprint	Designed to run on 100% solar power, no gases or environmental impact.
AI Analytics	Can be used in challenging environments to filer out false alarms such as live stock, trees and light reflection in water puddles
Thermal Imaging (Optional)	Provides visibility in challenging weather conditions such as fog,heavy rain or wind.
ANPR (Optional)	Provides ability to create lists and alerts for authorised/unauthorised vehicles.
Timed Audio Announcements	Proves ability to health and safety and other types of audio announcements

Max CCTV Tower

Our max range of towers are ideal for larger remote sites that don't have interrupted power supply and don't require advanced features

An Overview of the Product's Features and Benefits	
7 Meters Tall	The largest tower on the market, acts as an Overt visual deterrent
Mains Powered with 65hr battery backup	65 Hour backup provides coverage in the event of a temporary mains power loss on site
D4G Mobile Network Communication	No fixed comms required from customer
PTZ with 20x Zoom and powerful low light performance	300m coverage area.
110Db Loud speaker	Live Audio Challenge to acts as a deterrent to any intruders
Wireless PIR Detectors	Coverage of large sites with cameras automatically moving towards to triggered presets .
30 Days HD Recording	HD Recording can be used as evidence for security and H&S investigations.
IR and White Light Options	Visibility at night and optional white light option to deter intruders.
Modular Design	Can be installed anywhere - no lifting equipment required.

Terta CCTV Tower

The 5m Terta tower is our most affordable tower available and built with efficiency in mind. The Terta is available as a powered or self powered solar system and is ideal for the protection of smaller sites or areas containing high value assets.

An Overview of the Product's Features and Benefits	
5 Meters Tall	Large, acts as an Overt visual deterrent.
Solar/Generator/Mains Options with 106hr battery backup	Ability to run off grid when there is no site power or site power is switched off over a weekend.
4G Mobile Network Communication	No fixed comms required from customer.
4 x AI Analytics Fixed Cameras, powerful low light performance	40m coverage area, 360 degree recording and coverage with people and vehicle detection
110Db Loud speaker	Live Audio Challenge to acts as a deterrent to any intruders.
30 Days HD Recording	HD Recording can be used as evidence for security and H&S investigations.
IR and White Light Options, with Blue and Red Strobes	Visibility at night and blue/red/white light option to deter intruders.
Modular Design	Can be installed anywhere - no lifting equipment required.
Low Carbon Footprint	Designed to run on 100% solar power, no gases or environmental impact.
AI Analytics	Can be used in challenging environments to filter out false alarms such as live stock, trees and light reflection in water puddles
Timed Audio Announcements	Proves ability to health and safety and other types of audio announcements

Lite CCTV Tower

Our Lite product is compact and ideal for smaller sites. It can be fitted to a wide range of items including shipping containers, tripods and walls. If you're on a tight budget and looking for a quality cost effective solution, then Lite has you covered.

An Overview of the Product's Features and Benefits	
4G Mobile Network Communication	No fixed comms required from customer.
PTZ with 20x Zoom and powerful low light performance	300m coverage area
110Db Loud speaker	Live Audio Challenge to acts as a deterrent to any intruders.
Wireless PIR Detectors	Coverage of large sites with cameras automatically moving towards to triggered presets .
30 Days HD Recording	HD Recording can be used as evidence for security and H&S investigations.
IR	Visibility at night

Verifeyed Detection System

Our Verifeyed detection system can be used standalone or in conjunction with our CCTV towers, battery operated, wireless providing motion detection with HD image snapshot capture and advanced analytics.

Base Station

- 3G/4G
- 400 Day Battery
- Military Grade Encryption
- Tamper Proof Bolts
- Video Analytics Reduces false alarms
- 500 Meter Radio Range (Line of Sight)
- with Mesh support
- 110Db Siren Option

Detector /Camera

- Installation Takes just 2 minutes
- IP67 Weatherproof rating
- Dual Camera (Day / Night)
- Large Powerful IR Illuminator
- Ruggedized Body
- Tamper Proof Bolts
- 500 Meter Radio Range (Line of Sight)
- with Mesh support
- 35 Meter Detector Range

MAPS Mobile Asset Protection System

Our Mobile Asset Protection System, or MAPS for short, is a technologically advanced wireless security system that can be rapidly deployed to sites that require an effective visual deterrent and flexible on-site positioning.

This industry-leading mobile security system features an impressive 70 metre, 360-degree detection range and wireless monitoring through its 4 fixed HD cameras, providing incredible image quality. This system also provides ultra-fast image transmission speeds from site to operator, ensuring any possible issues can be actioned in real-time. In the event of an intruder on site, MAPS also features both live and pre-recorded audio voice challenge to further deter would-be trespassers.

Deterring crime from the outset is always the best possible strategy, and due to its formidable size and visual presence, MAPS provides a real deterrent against criminal activity. Advanced features such as object recognition and powerful LED lights are included with this system alongside GPS tracking and tamper detection for enhanced system protection.

Our national service teams can deploy MAPS within 24 hours throughout the UK and Northern Ireland, so if you're looking for a cost-effective, feature rich security deterrent, then MAPS has you fully covered.

MAPS Advanced Features

DEFENSIVE MEASURES AND SYSTEM PROTECTION

Links criminals to their crime scenes through state-of-the-art synthetic DNA technology, enabling police to later identify intruder. SelectaDNA signage also provides an additional highly effective visual deterrent.

- GPS tracking
- Tilt and tamper sensors

ADVANCED CONNECTIVITY

Advanced connectivity features ensure secure remote access to video footage and audit events for customers and operators.

- 4G/2G Mobile communication with network roaming
- Advanced real-time reporting
- Customer portal
- Mobile App connectivity
- Up to 4-year battery life

EFFECTIVE DETERRENT

MAPS provides a real deterrent against criminal activity, whilst still remaining quick to deploy and easy to relocate.

- 1.6m tall and 60kg weight
- 4 ultra-powerful high efficiency LED lights
- Pre-recorded or live ultra-loud audio challenge
- High visibility fluorescent decals
- Optional SelectaDNA spray with warning signage

INDUSTRY-LEADING DETECTION

Due to the impressive detection range of MAPS cameras, we can cover a larger site area using less units, saving customers considerable cost.

- 70m diameter PIR detection range
- 360-degree vision
- 4 fixed high-definition cameras
- Fully mobile unit allowing easy
- ADVANCED CONNECTIVITY repositioning

INTELLIGENT TECHNOLOGY

Incredible high-definition video quality, day or night, with a range of advanced technological features usually found in much higher priced systems.

- Ultra-fast transmission speeds from site to operator ensuring faster response times
- Object recognition to help reduce false alarms and promote actionable intelligence
- Camera masking creates privacy for sensitive areas

WHO NEEDS MAPS?

MAPS is an ideal security solution for site owners with the following needs:

Smaller sites that need less area coverage

Essential coverage of highly valuable assets or compound areas

Rapid 24-hour deployment throughout the UK and Northern Ireland

Sites where flexible security and mobile positioning is required

Sites working with lower security budgets

WHY CHOOSE INNOVATIVE SECURITY?

Technologically advanced range of security products to suit all environments

Free site survey to advise on the most efficient and cost effective solution

24/7/365 monitoring through our accredited Alarm Receiving Centre (ARC) team

Significantly reduce upfront costs by renting, rather than purchasing

All maintenance included within the rental agreement

A truly national service team that can be rapidly deployed to any UK location
